Cruise In Kimberley

Kimberley cruising adventures visit remote wilderness areas on overnight or extended trips. Day tours offer the chance to explore the Dampier Archipelago and snorkel the crystal clear waters, take a hovercraft flight across Broome's Roebuck Bay or be dazzled by Lake Argyle on at sunset. Meanwhile extended tours (from five to 14 days) let clients really experience the thundering waterfalls, rugged cliffs and fascinating wildlife of the region, and range from basic to luxury. [CLICK HERE](#) to check out the cruising operators.

Head Underground

The South West has some spectacular caves rich in aboriginal legends, full of beautiful crystals and stunning stalagmites and stalactites. Try Ngilgi, the caves of Margaret River, the huge Jewel Cave, Mammoth Cave (perfect for those who like to do their own thing) or the crystal wonderland of Lake Cave.

Regional WA Demand

A growing number of Kiwis are visiting Western Australia and with more flights and the easier access into regional WA through the new Air New Zealand/Virgin Australia alliance—now is a good time for clients with friends and family to head over, says GO Holidays.

While many Kiwis have seen the highlights of Perth and surrounds, the wholesaler is reporting increased demand for self-drive options into the regions including Margaret River and Australia's North West.

"WA offers a number of unique adventures from whale sharks to wildflowers and outback to vineyards and we are seeing more interest in product beyond the gateways," says GO Holidays short-haul manager Wayne Deed.

... North West

WA's north west region is home to some diverse geographical areas, each with its own drawcards, from Broome on the

west coast, home to the world famous Cable Beach, camel treks, pearls and the so-called staircase to the moon; to the outback region of Kununurra and the legendary Gibb River Road. The region is also home to the 300m high Bungle Bungle rock formations and the dramatic scenery of the Karinjini National Park.

... South West

Located just 90-mins drive from Perth, WA's south west region is becoming an increasing popular option for Kiwis looking for a little soft adventure, says GO Holidays. Famed for its wines, forests and wildflowers the region is also home to great stretches of white sandy beaches as well as abundant dolphin and whale spotting. The area is a popular self-drive option with the Kiwi market, and GO is reporting increased interest from those looking at a campervan holiday through the region.

WA Feature

See More By Foot

A huge range of walking trails in the south west pass through some of the region's most beautiful areas and offer a great way to experience the natural landscapes of an area. Suggest clients have a go at all or part of the Bibbulmun Track, a 1000km track which stretches between Kalamunda and Albany. The award-winning track, recognised as one of the world's great long distance trails, passes forest, pretty farmland, rugged coastal cliffs and remote beaches, as well as some of the region's most popular attractions like the Gloucester Tree in Pemberton and the Tree Top Walk near Walpole.
